**House of Vinyl Wrap**

Air Free Technology

High quality, Low price, Always in stock, Large volume manufacturing

## Product Description

Not only does it look stylish but is more flexible and is a certified automotive wrap vinyl. Our wrap vinyl is a must have for full or part wraps. Can be applied to your car's hood, trunk, roof, dashboard, gauges, interior, amplifiers, wheels, mirrors, door handles, glass, cell phones, laptops, iPods, motorcycle parts, metal parts and just about any relatively non-porous surface.

The film is coated with a UV coating. Once applied and bonded to your surface you may clean it with any type of cleaning agent that is used for painted surfaces. The material is soft and highly flexible allowing it to conform to contours and bend easily. After applying the Vinyl Sheet, you simply trim the excess vinyl with a sharp blade or hobby knife (not included). What you have left is a customized look without the headaches and costs associated with painting.

- Made with automotive grade premium high quality cast vinyl that is used for wraps and conforms to the most challenging contours and shapes.
- Can be re lifted, repositioned and stretched before going over with a squeegee.
- When applied correctly to the appropriate hard surface the film is very durable.
- Will not harm painted surfaces. Can be easily repositioned during installation and does not leave adhesive residue behind.
- Grid pattern backing for more precise measuring and cutting.
- Top quality German adhesive with built-in air channels for easy, bubble-free installation.
- Extremely Flexible and can be applied to moderate curves or any smooth flat surface.
- Coated with a UV protective layer.
- Durable material resistant to water, dirt, grease, salt, mild acid and oil.
- Easily remove without residue, will not harm the painted surface of your vehicle.
- Vinyl Wrap
- Air Free Technology
- 30m X 1.52cm Roll
- No Bubbles

## Installation

Easy to install and remove, and they won't harm the painted finish surface of your vehicle. Glossy smooth surface easily cleaned with water Permanent acrylic pressure-sensitive adhesive backed, easy to apply.

### Tips:

- Cleaning the surface with rubbing alcohol prior to installing the vinyl will help with adhesion.
- Clean any contaminants that may cause imperfections.
- Using a heat gun can aid in the installation by making the vinyl more pliable and also helps remove wrinkles.
- Using a soft rubber squeegee will help smooth out bubbles and wrinkles.

Product	Vinyl Wrap Air Free Technology
Thickness	0.16mm - 0.18mm
Heat resistance	-50°C to +200°C
Stretch rate	33+ pascal
Glue material	Acrylic solvent-based, Dry application
Glue thickness	0.03mm
Glue weight	30g/m <sup>2</sup> ±2gm <sup>2</sup>
Weight of release paper	140gsm embossing paper
Thickness of release paper	0.15-0.16mm
Stand up against	water, dirt, grease, salt, weak acids oil
Durability period	Indoor 3-4 years; outdoor: 1-2 years
Compatibility	Die cutting, car decoration, architectural decoration, vinyl wrap
